

Human Rights and Lives Activity

This week is your opportunity to engage with another school to discuss:

- What you have learned during the programme
- What you have changed in your lives and in the school as a result
- Anything you found interesting/explored in further detail.

You may also wish to research a particular issue to discuss further. For example:

- Carbon, food and water inequality around the world
- The Paris Climate Agreement
- The objectives of COP26 and how we can meet them
- The implications of climate change on your part of the world.

Please work with your partner school to discuss these in advance. We would love to hear what came from these conversations and see any images or videos!
