Jacobs

Jobs of the Future Activity

This week is an opportunity for the young people to hear about real jobs from the STEM industry directly from the people that do them. Please select any video from the lists on the following slides and watch it with your class. Please select whichever video you like and record which one you used using the tables to avoid repetition in future years. This resource will continue to evolve and grow over time.

Name	Job Title	Video Link	Video Length	Year Viewed	Additional Notes
